DETAILED ACTION

Allowable Subject Matter

Claims 1-6, 8, 19-24, 26-32, 34, 51-56, 58, 69, and 75-79 are allowed.

The following is an examiner's statement of reasons for allowance: The amended claims feature a network device that comprises a traffic scheduler, classifying the network traffic, a resource reservation engine, and a receiver that receives a request from a client for a session to a receiver. A session ID is assigned to the first session, and upon a second request for a session to a second receiver, a second session ID is assigned. A determination takes place as to whether the two session IDs match, and if so, the reserved resources are shared between the first and second sessions. Because the use of a singular session ID takes place during sessions between a client and two different receiving entities, it is believed that the claimed invention is novel. The examiner was unable to procure prior teachings for such features as claimed by the amended claims and could not render said features obvious to one of ordinary skill in the art, without the use of impermissible hindsight constructions. Additionally, Applicant's remarks regarding the claim amendments and the provided prior art references' deficiencies are persuasive, in that none of the references taken singly, or in combination, teach the newly claimed features. Further, Applicant's assertions that the claims are of statutory subject matter are also persuasive. It is therefore the examiner's belief that the claimed invention does indeed possess novelty.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue

fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance."
